

Welcome to Putting Children, Young people and families First Always.

Supporting Children and Families with Compassion, Expertise, and Dedication

Thank you for visiting my website. I provide exceptional rehabilitation case management services, rooted in a deep commitment to helping children and families thrive. For over three decades, I have specialised in supporting children, particularly those with acquired brain injuries (ABI) and life changing Injuries, using a blend of compassion, expertise, and understanding.

My Values and Approach

I believe in prioritising the needs of children and their families above all else, focusing on their satisfaction and positive outcomes. Honesty, trust, and professionalism form the foundation of everything I do. Rehabilitation case management requires collaboration and innovative, solutions-focused approaches, and I ensure that every step is taken with care and purpose. My goal is to empower families and stakeholders through tailored strategies that create meaningful change.

My Experience

Throughout my career, I have held senior roles in the NHS, private, and charity sectors, which have provided me with a wealth of experience and insight into rehabilitation case management. My academic background includes an MA in Leadership and Management in Health and Social Care, which complements my practical expertise. Over the years, I've served in roles such as Director of Nursing and Therapy, Business and Service Development Manager, and Stakeholder Service and Contracting Manager. These experiences have shaped my ability to assess, develop, and implement comprehensive therapeutic, health, medical, educational, and social care plans tailored to each individual rehabilitation journey.

My MA research/dissertation focused on the lived experience of senior frontline clinicians who provided direct intervention to children with ABI. When I finished the research, I

changed the tile to 'I thought I was looking after the child'. This was in recognition of the inseparable considerations for not only the child's needs, but for the family's needs required to provide the support for their child's future success.

Clinical and Rehabilitation Expertise

Much of my work involves supporting children and families through some of the most challenging circumstances, including complex clinical cases, clinical negligence, and catastrophic injuries. Rehabilitation case management is at the core of my approach, ensuring that families receive the knowledge, skills, and support they need to navigate their journeys with confidence. I approach these situations with competence, self-assurance, and a deep understanding of family dynamics, helping families build systems that scaffold recovery and foster resilience.

Why Work with Me?

Building trust and fostering meaningful relationships are essential to successful rehabilitation case management. I value creating an environment where families feel supported, understood, and empowered. My approach is professional yet approachable, combining clinical expertise with a friendly, open, and warm demeanour. My goal is always to make a genuine difference in the lives of children and families, offering rehabilitation solutions that lead to brighter futures and lasting positive change.

I am a father of 3 (now young adults) and have dedicated my life to supporting them through their developing years, ups and downs, joy and sadness. While I don't know your child, yet I will endeavour to provide the same level of commitment to supporting yours.

Thank you for considering my services. Together, we can create impactful rehabilitation strategies that make a meaningful difference for you and your family.
